FLEX Open-Ended Items

What aspects of the course design and/or delivery most benefitted your learning?

Comments
The surveys and discussions were very helpful and thought out
The aspects of discussing our previous assignments and going over answers, along with preparing for exams most benefitted my learning.
I enjoyed the way the material was taught. The material stuck with me because we learned it twice with notes and lectures. Also, reading questions helped me learn the material better as well.
group discussion and reviewing specific questions in class
I liked the lecture style and the conversations in class.
I liked that we worked in groups frequently, allowing us to discuss various topics with our peers. I also liked that a lot of the activities were engaging and not just review in the form of a lecture.
Some things that really benefitted me was her teaching and reviewing the material from class. As well as how warm and welcoming she is.
I enjoyed the presentations that were given
Going over the Reading questions in class and the activities that the instructor planned for lessons helped me to understand the readings better.
The weekly reading short–answer questions that we did, and then reviewed them in class.
Reviews of readings every week in discussion for better understanding.
What I mostly benefited from were the ATEs and group activities
I liked having the little in class activities to do every week, I felt like they aligned with what we were learning in class.
The discussion and activities geared to what we were learning about in class.
I think definitely the activities in section. They were usually a fun way to visualize the content and material we learned in lecture.
definitely going through the course material from class and having the instructor in discussion having her own slides and breaking down the key concepts for us
The reading questions.

Comments
Being able to asl questions
Lively dicussions
How very well–communicated she is, as she explained everything clearly and made sure everyone had a general understanding of the topic being covered. Lee welcomed everyone with a kind spirit, which allowed introverted students to engage in the discussion.
The RQ review and discussion about class.
Going over our reading questions in class and being able to ask questions if needed.

What change to the course design or delivery would most benefit your learning?

Comments
nothing
I would add more exam prep to the course to benefit learning. Before exam weeks, I think it would be beneficial for students if there were more exam prep and going over the content again.
I feel like the actual material was a little bit all over the place. I would have loved to learn more about the history of women in politics rather than primarily current events. I feel that we were mostly repeating similar statistics/trends about women currently. Also, learning ways to advocate for women in politics/ how to prevent stereotyping would be interesting as well.
posting the coursework such as slides to canvas so we can use it to study outside of class
Practice quizzes and a study guide a week before the exam would be beneficial
Honestly, I don't think anything really needs to be changed.
none
I wish we had a few more involved activities
N/A
More time going over what is going to be on the exams.
N/A

Comments
Nothing much needs to be changed
maybe giving little recaps about what we learned in lecture that week before starting activities in discussion.
n/a
Maybe some more variety in assignments versus just RQs.
to give out a study guide, doesnt have to be too specific but to have the key concepts we should know at least a week before the test would be better.
Posting the slides for review after.
NA
more clarity on homework assignments
N/A.
Nothing. It was well done.
Not teaching straight from the textbook. Incorporating other real–world examples.

What recommendations would you give to future students of this course?

Comments
none
Focus on doing the readings and other shorter assignments, especially when in section to help deepen understanding.
Take it!
make sure to have a friend in the class in case you ever need notes because you can't get them otherwise
Make sure to keep up with the readings of the course.
I would recommend them just to do the work. The readings can seem long, but they're really not hard.
That the professor and TA are passionate about what they are teaching about and genuinely want to help the student learn and understand the material.

Comments
Just go to class and discussions and you'll be fine
Read the readings; they are actually really interesting.
Do the readings and go to the lecture, and it'll be fairly easy.
Go to discussion every week, and listen and take notes in lecture and everything will go smoothly.
Complete all of the ATEs and RQs
Attend lecture or else you will not know what is going on in discussion
show up to discussion its fun
Juts attend lecture and stay on top of assignments and you'll be ok!
really pay attention in class and take a lot of notes
Do the assigned readings when they are assigned and keep up with them.
Take it
attendance is key
Be on top of your work.
Just to attend class and complete the readings.
Just show up to class. It will make the assignments and tests a lot easier.
